

Cyber Active Protect

Rethinking Cyber insurance

A unique combination of insurance, MFA, and MSSP for real-time, effective defense against cyber threats. By partnering with leading technology providers Silverfort and Cynet, DUAL delivers a powerful, all-in-one cyber protection solution designed to enhance risk quality and market accessibility.

Why DUAL Cyber Active Protect

DUAL Cyber Active Protect redefines Cyber protection by integrating insurance coverage with advanced Cybersecurity tools, helping to ensure robust defense against modern threats while simplifying the underwriting process.

Target classes

Ideal for SMEs and first-time buyers, seeking comprehensive and simplified Cyber protection, particularly those facing challenges in implementing advanced protection against cyber threats.

Solution highlights

- ✓ **Integrated Cybersecurity and insurance coverage**
Proactive risk mitigation by combining identity protection and a highly effective all-in-one Cybersecurity platform with comprehensive Cyber insurance coverage.
- ✓ **Streamlined underwriting**
Eliminates the need for traditional cyber risk questionnaires for standard SME business and helps to significantly reduce underwriting questions for complex risks.

Technology partners

Provides cutting-edge identity protection through universal MFA enforcement across on-premises and cloud environments.

Delivers an all-in-one Cybersecurity platform with endpoint protection, network analytics, monitoring and automated incident response.
